

CHANGING LIVES CHARITY

A labour of love from people who have been given a helping hand by others in the past

OUR STORY STARTS

Our story starts with two young South African boys, Christopher Kgopa and Kenneth Masimula, growing up in impoverished rural areas of South Africa. Through a twist of fate they both encountered mentors who stepped in and through their kindness and generosity, changed the trajectories and the lives of these young rural boys so that they grew up to be successful and professional entrepreneurs in the new South Africa.

OUR STORY ENDS

Our story ends with these now grown men wanting to give back to others what was given to them through these random acts of kindness and generosity by these total strangers. They have now created this charity to help the impoverished and disadvantaged young South Africans living in the rural areas around Hammanskraal and Hluhluwe who are in desperate need of assistance.

Christopher Kgopa

Kenneth Masimula

OUR PROGRAMS

Our charity programs are primarily designed to assist *children* living in impoverished *rural areas* of South Africa in provinces like northern Gauteng and KwaZulu-Natal.

The recipients of our donations live in underserved areas like *Hammanskraal* and *Hluhluwe* in KwaZulu-Natal where there is a significant shortage of resources which adversely affects these children who are growing up in *poverty*.

Most of these children will never be able to attain their full potential due to being impacted by socio-economic factors that limit their *school attendance* and prevent them from obtaining the required education needed to be able to seek a higher education.

School Support

We provide uniforms, shoes and other necessary school-related items that these children require. We also provide food so that the children can have lunches at school.

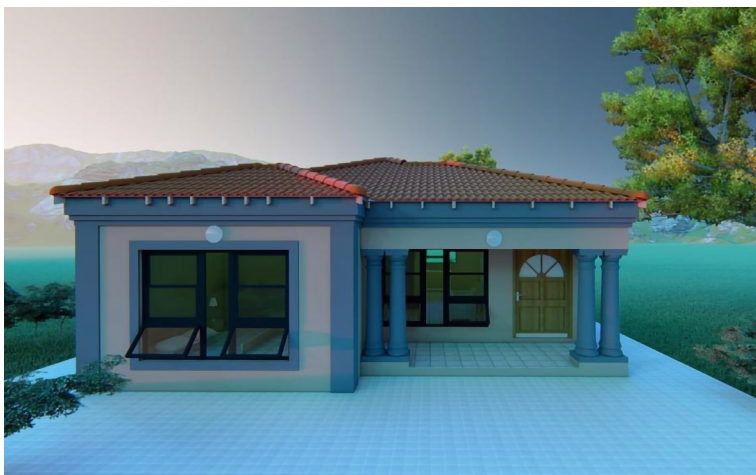

Sanitary Saviours

We supply free sanitary pads to young school girls twice monthly so that they do not have to miss school during their monthly menstruation periods.

Habitable Housing

We build low-cost housing for child-headed families where the parents have died due to HIV and the children are often left to fend for themselves. These self-contained sturdy houses have two-bedrooms with a kitchen and a bathroom.

HOW TO HELP US

We invite you to become part of our effort to uplift these less fortunate souls whose daily lives are a struggle for survival. Our motto is to change lives, one day at a time. Often times changing someone's life for the better can be simpler and less costly than you would expect. Please make a donation towards our programs. All donations will receive a certificate for SARS so that you can submit your donation as a tax-deductable expense.
